Introduction	11
1. First integrals and solutions of the traveling wave reduction for the Triki-Biswas equation	15
1.1. First integrals for Triki-Biswas equation . . . . .	16
1.2. General solution of the traveling wave reduction for the Kaup-Newell equation . . . . .	18
1.3. Exact solutions of the traveling wave reduction for the Triki-Biswas equation . . . . .	23
2. First integrals and general solution of the traveling wave reduction for Schrödinger equation with anti-cubic nonlinearity	27
2.1. First integrals of the traveling wave reduction for the Schrödinger equation with anti-cubic nonlinearity . . . . .	29
2.2. General solution of the traveling wave reduction of equation with anti-cubic nonlinearity . . . . .	30
2.3. Another general solution of the traveling wave reduction for equation with anti-cubic nonlinearity . . . . .	32
2.4. Some special solutions of the traveling wave reduction of equation with anti-cubic nonlinearity . . . . .	36

3.	General solution of traveling wave reduction for the Kundu-Mukherjee-Naskar model	39
3.1.	First integrals of the traveling wave reduction for the Kundu-Mukherjee-Naskar model. . . . .	40
3.2.	General solution of the traveling wave reduction for the Kundu-Mukherjee-Naskar model expressed via the Weierstrass function. . . . .	42
3.3.	General solution of the traveling wave reduction for the Kundu-Mukherjee-Naskar model expressed via the Jacobi elliptic function . . . . .	46
4.	General solution of the traveling wave reduction for the perturbed Chen—Lee—Liu equation	50
4.1.	First integrals of the traveling wave reduction for the Chen-Lee-Liu equation . . . . .	51
4.2.	General solution of the traveling wave reduction for the the Chen-Lee-Liu equation . . . . .	52
4.3.	General solution of the traveling wave reduction for the Chen-Lee-Liu equation expressed via the Weierstrass function . . . . .	56
4.4.	General solution of the Chen-Lee-Liu equation at $\beta = -\lambda$ and $b = \lambda$ . . . . .	60
4.5.	Some exact solutions of the traveling wave reduction for the Chen-Lee-Liu equation . . . . .	61
5.	Traveling wave solutions of the generalized nonlinear Schrödinger equation with cubic-quintic nonlinearity	69
5.1.	First integrals of the traveling wave reduction for Eq. (5.1). . . . .	70
5.2.	General solution of Eq. (5.1) at $h \neq 0$ and at conditions for $\omega$ . . . . .	72
5.3.	Solitary waves of Eq. (5.1) at $h \neq 0$ and at conditions for $\omega$ . . . . .	75
5.4.	General solution of Eq. (5.2). . . . .	79

6. A generalized model for description of propagation pulses in optical fiber	85
6.1. Traveling wave reduction in Eq. (6.1) and its first integrals. . . . .	86
6.2. Transformations of Eq. (6.5) and Eq. (6.6) to integrable differential equations. . . . .	87
6.3. General solution of Eq. (6.7). . . . .	93
6.4. General solution of Eq. (6.8). . . . .	100
7. Construction of nonlinear differential equations for descrip- tion of propagation pulses in optical fiber	105
7.1. Method applied . . . . .	106
7.2. The fourth-order nonlinear partial differential equation for description of the propagation pulse and their exact solutions . . . . .	110
7.3. The sixth-order nonlinear partial differential equation for description of the propagation pulse. . . . .	112
7.4. General solution of Eq. (7.6). . . . .	118
8. Solitary and periodic waves of the hierarchy for propaga- tion pulse in optical fiber	121
8.1. Method applied . . . . .	122
8.2. Exact solution of Eq. (8.1) at $M = 1$ . . . . .	127
8.3. Exact solution of Eq. (8.1) at $M = 2$ . . . . .	130
8.4. Exact solution of Eq. (8.1) at $M = 3$ . . . . .	131
9. First integrals and general solution of the Fokas-Lenells equation	135
9.1. First integrals of the traveling wave reduction for Eq. (9.1) . . . . .	136
10. Periodic and solitary waves of the Biswas-Arshed equation	146
10.1. Periodic and solitary wave solutions of the Biswas- Arshed equation . . . . .	147

11. Method for finding highly dispersive optical solitons of non-linear differential equations	154
11.1. Properties of the function $R(z)$ .	156
11.2. Algorithm of the method with function $R(z)$ for finding solitary wave solutions.	157
11.3. Examples of application $R(z)$ for finding exact solutions of nonlinear differential equations.	161
12. Highly dispersive solitary wave solutions of perturbed non-linear Schrödinger equations	170
12.1. Method applied	171
12.2. Optical solitons of hierarchy (12.1) at $N = 2$ .	173
12.3. Optical solitons of hierarchy (12.1) at $N = 3$ .	175
12.4. Optical solitons of hierarchy (12.1) at $N = 4$ .	177
12.5. Optical solitons of hierarchy (12.1) at $N = 5$ .	179
12.6. Simple solitary waves solutions of hierarchy (12.1).	182
13. Solitary wave solutions of hierarchy with non-local nonlinearity	188
13.1. Solitary wave solutions of hierarchy (13.2).	189
13.2. Solitary wave solutions of Eq. (13.3).	190
14. Highly dispersive optical solitons of the generalized non-linear eighth-order Schrödinger equation	196
14.1. Method applied	197
14.2. Highly dispersive optical solitons of equation (14.3) at $b_4 \neq 0$ .	198
14.3. Highly dispersive optical solitons of Eq.(14.3) at $b_3 = b_4 = 0$ and $b_2 \neq 0$ .	201
14.4. Highly dispersive optical solitons of Eq.(14.3) at $b_2 = b_3 = b_4 = 0$ and $b_1 \neq 0$ .	204
15. First integrals and general solutions of the Biswas-Milovic equation	206
15.1. First integrals for traveling wave solutions of Eq.(15.1)	207
15.2. The general solutions of Eq.(15.8)	208

16. Periodic and solitary waves in optical fiber Bragg gratings with dispersive reflectivity	214
16.1. Exact solutions of Eqs. (16.1) and (16.2)	216
17. First integrals and general solution of the complex Ginzburg-Landau equation	222
17.1. First integrals of the traveling wave reduction for the complex Ginzburg-Landau equation	223
17.2. General solution of Eq.(17.7) at $\alpha = 2\beta$ and $a \neq 2\alpha$	224
17.3. Periodic and solitary wave solutions of Eq. (17.7) at $a = 2\alpha$ and $\alpha \neq 2\beta$	226
17.4. General solution of Eq.(17.7) at $\beta = 2\alpha - 3a/4$ and $a \neq 2\alpha$	228
17.5. General solution of Eq.(17.7) at $\beta = 3a/4 - \alpha$ and at $F( q ^2) =  q ^4$	230
17.6. Periodic and solitary wave solutions of Eq.(17.7) for $F( q ^2) =  q ^{2n}$ at $\beta = (2n - 1)a/4 - (n - 1)\alpha$	232
17.7. Solitary wave solutions of the complex Ginzburg-Landau equation	234
18. Solitary wave solutions of the generalized Biswas-Arshed equation	238
18.1. System of differential equations corresponding to Eq. (18.1)	239
18.2. Exact solutions for system of equations (18.4)	239
18.3. Solitary wave solutions of equation (18.3)	242
18.4. Solutions of the system of equations (18.3) and (18.4)	244
18.5. Results by Tahir and Awan at arbitrary nonlinearity index $n$	245
19. Traveling wave solutions of the generalized Gerdjikov-Ivanov equation	249
19.1. First integrals of the traveling wave reduction of Eq. (19.1)	250
19.2. The general solution of Eq. (19.7) at $m = 1$	252

19.3. The general solution of Eq. (19.7) at $m = 2$ . . . . .	257
19.4. Exact solutions of Eq. (19.1) at arbitrary $m$ . . . . .	259
20. Highly dispersive optical solitons of equation with various polynomial nonlinearity law . . . . .	261
20.1. System of equations for real and imaginary parts to Eq. (20.1) . . . . .	262
20.2. Exact solutions of Eq. (20.7) . . . . .	262
20.3. Solution of Eq.(20.11) . . . . .	266
21. Optical solitons of mathematical model with arbitrary re- fractive index . . . . .	269
21.1. System of equations for real and imaginary parts to Eq. (21.1) . . . . .	269
21.2. Solitary wave solutions of Eq. (21.4) . . . . .	270
22. Highly dispersive optical solitons of equation with arbi- trary refractive index . . . . .	273
22.1. System of equations for real and imaginary parts to Eq. (22.1) . . . . .	274
22.2. Conditions for solitary wave solutions of Eq. (22.4) . . . . .	274
22.3. Optical solutions of Eq. (22.1) . . . . .	277
23. On traveling wave solutions of the Kundu-Eckhaus equation . . . . .	281
23.1. Traveling wave solutions of Eq.(23.1) . . . . .	282
23.2. The Painlevé test for the traveling wave reduction of Eq.(23.1) . . . . .	283
23.3. The general solution of Eq.(23.7) . . . . .	285
24. Optical solitons of model with integrable equation for wave packet envelope . . . . .	288
24.1. System of equations corresponds to Eq.(24.1) . . . . .	289
24.2. The Lax pair for Eq.(24.6) at some constraints . . . . .	290
24.3. First integrals for Eq.(24.21) . . . . .	292
24.4. Special solutions of Eq.(24.6) . . . . .	294

24.5. General solution of Eq.(24.33) . . . . .	296
25. Optical solitons of the model with arbitrary refractive index	301
25.1. System of equations corresponding to Eq.(25.1) . . . . .	301
25.2. Traveling wave solutions of Eq.(25.1) . . . . .	302
